

SYSTEM, APPARATUS, AND METHOD FOR PROVIDING MEDIA SESSION DESCRIPTORS

ABSTRACT

5 A system, apparatus, and method is disclosed for providing media session
descriptors. In accordance with one embodiment of the invention, a method of initiating
a multimedia session via a computing arrangement involves forming a request for a
session descriptor usable for initiating the multimedia session. The request is
communicated to a session descriptor module of the computing arrangement. A session
10 descriptor is formed based on a set of multimedia session parameters of the computing
arrangement. The session descriptor is communicated from the session descriptor
module, and the multimedia session is initiated using the session descriptor.
